ABOUT THE SMART LOVE PRESCHOOL GARDENING PROGRAM

Smart Love's preschool garden program offers exciting opportunities for play-based learning and seed-to-table curriculum. The children make soil blocks for seed germination, tend and nurture the growing plants, and harvest and enjoy what they have grown. Our season-extending greenhouse and classroom grow lights provide year around learning. The Natalie G. Heineman Smart Love Preschool provides a play-based preschool curriculum for children 3-6 years and parent and child programs for younger children. Our program focuses on strengthening children's social and emotional health and igniting their intellectual creativity, setting them up for future academic success.
